## DETAILED ACTION

1. Applicant's election without traverse of claims 3 and 9 in the reply filed on 02/25/05 is acknowledged.

### *Claim Objections*

2. Claims 4-9 are objected to because of the following informalities: they are dependent upon claims 1 and 2 which are withdrawn claims. Appropriate correction is required.

### *Claim Rejections - 35 USC § 102*

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 3 is rejected under 35 U.S.C. 102(e) as being anticipated by Morales (US 2003/0014804).

In regard to claim 3, Morales teaches an article of apparel (10) capable of being used with trousers worn low on the hips (column 2, paragraph 0021). A panel of flexible material configured to encircle the waist of a person having an upper edge and a lower edge (paragraph 0028, figures 2-4). An elastic waistband (26) located near the upper edge of the panel of flexible material, disposed to constrict about the waist of a person (paragraph 0020). A drawstring (34) located along and near the lower edge of the panel

of flexible material, disposed to constrict over a wearer's garment (figures 2-4). The garment of Morales is capable of constricting over trouser worn low on the hips preventing the trouser from hip disengagement.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Morales.

In regard to claim 9, Morales teaches the panel of flexible material having a proximal end (14a), a distal end (14b) and a hook and loop fastener (38a, 38b) disposed to releasably join the proximal end to the distal end (figures 1 and 4).

However, Morales fails to teach the fastener connecting the distal and proximal end together being a slide fastener.

At the time the invention was made, it would have been an obvious matter of design choice to a person of ordinary skill in the art to have provided the fastener being a slide fastener because Applicant has not disclosed that the fastener being a slide fastener provides an advantage, is used for a particular purpose, or solves a stated problem. One of ordinary skill in the art, furthermore, would have expected Applicant's invention to perform equally well with fastener being a slide fastener or hook and loop fastener, because as long as the fastener connects the distal end to the proximal end

the type of fastener is not critical. Therefore, it would have been an obvious matter of design choice to modify Morales to obtain the invention as specified in claim 9.

***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Noble, Keller, Warren, Parris, Randolph, Goldstein, Matthews, MacRae, Brent, Geimer, Ewerwahn, Mundt, Kalso, Perez, Gallegos, Hunt, Aldridge, Hewitt, Calleja, Vesterinen, Hube, Schaefer, Head, Dzielak, Jolla, Ganz, Counts, Morrison, Rosenberg, DaBaene, Crisp, Rhoden, Jackson, Garcia, Leach, DiMaio, Bass, Guilani, Villalobos, Carney and Stangle are all cited to show closely related garment articles.
